Subject: Re: Malibu Unites and PEER comments on Environ "Site Specific PCB-Related Building Materials Management, Characterization and Remediation Plan"

Hi Kelly,

Thank you for sending me a copy of the email sent to Kurt Fehling at Malibu Unites. I am going to follow up on this to see why Malibu Unites has not responded with the requested information.

I do have another request:

I would like to get a site map of Juan Cabrillo & Malibu Highschool showing

1. Where you have tested air & done wipe testing.
2. Where you have tested ballasts
3. Where fluorescent light ballasts have been removed
4. What windows have been replaced at Juan Cabrillo. I was told by the Principle this occurred possibly back in 1991.

I am still requesting that the caulk in all rooms pre 1979 be tested.

Kind Regards,

Tara Buran

Subject: FW: Malibu Unites and PEER comments on Environ "Site Specific PCB-Related Building Materials Management, Characterization and Remediation Plan"

Kurt,

As you are the technical consultant to Malibu Unites, we would like to request additional information on the attached data set that was not readily discernible or apparent from the lab reports or the Key to BC Laboratories, Inc. Report provided in the PEER/MU comments to us (see attached).

- For each sample listed in the Key to BC Laboratories Report, please revise the key to provide the name of the school, building, and placarded room number where the sample was taken. This will help avoid confusion as there are multiple PE offices, and rooms with the same room number at each campus.
- Please also identify the location where the sample was taken within the room, along with any pictures taken of the collection area.
- Please provide the complete chain of custody as the one included with the laboratory results only shows signature release by Frontier on 6/12/14 and BC Laboratories receipt on 6/13/14, but the samples were collected on 5/10 and 5/12, 2014.
- Please provide the third party validation report. The laboratory data were described as "third party validated," but we did not see the third party validation report.

We appreciate your assistance in providing us this information so that we can have the full set of information to evaluate and consider as part of our on-going work at MHS and JCES.

Thank you.

Dear Superintendent Lyon and Environ officials:

Attached please find the comments of Malibu Unites and PEER, as well as attached laboratory PCB sampling results, which are also being submitted to EPA.
